GW

The Department has reviewed the status of your pump test and any requests for extension(s) or exemption(s) for the following permitted well(s). The results are summarized in the following table:

| Application | Water Right | Permitted Well | Pumped Well | Test Date | Request Status | Exemption | Well Name |
|-------------|-------------------|----------------|-------------|------------|----------------|-----------|-----------|
| G 15207 | Permit: G 14004 * | UMAT0001700 | UMAT0001700 | 03/26/2009 | APPROVED | None | |

Pump tests are intended to provide aquifer and well information for ground water resource characterization and to help solve well problems (OAR 690-217-0015(9)). A review of the test results indicates that there are one or more deficiencies (listed below) related to the requirements for pump tests outlined in OAR 690-217, however; it is likely that any re-testing would constitute an unreasonable burden on the permittee and would provide data of only marginal value in satisfying the intent of the rules.

o

Although this test is being approved for this well on the above listed permit(s), it is unlikely that the approval will carry forward onto any new permits or multiple-well exemption requests. If a new permit is issued for this particular well that requires a pump test or if you wish to request a multiple-well exemption on any other wells using this approved test, you may be denied and will need to perform a new test.

Please contact me if you have any questions.

Sincerely,

Josh Hackett
