## **Initial Review and Proposed Final Orders**

The following pages of this notice list permit applications that the Department is evaluating for compliance with state water law. Public participation and comment is encouraged. Opportunities for public involvement vary according to the stage of the permit evaluation.

Ground water permit applications in the Deschutes Basin (Basin 5) may seek to provide mitigation pursuant to the Deschutes Ground Water Mitigation Rules.

### **Initial Review Stage (IR)**

The Department has given the applicant an initial review of water-use restrictions, water availability and other limitations that affect the agency's decision on whether to issue a permit. The Department welcomes comments from interested persons, agencies and organizations on the proposed water use. **The comment deadline for initial reviews appearing in this public notice is 5pm, Thursday, August 31, 2023.** Although we cannot respond individually to all comments, each will be considered as the agency makes its decision regarding proposed allocations.

### **Proposed Final Order Stage (PFO)**

The proposed final order is the Department's penultimate decision on the water use request. The PFO documents the agency's decision through specific findings, including review of comments received. If appropriate, it includes a draft permit specifying any conditions or restrictions on the use. Persons interested in receiving a mailed copy of a PFO must pay a statutorily-required fee of \$35. (Any person paying \$35 to receive a PFO by mail will also receive a copy of the Final Order when it is issued.) PFO's may be viewed free of charge online at: <http://apps.wrd.state.or.us/apps/wr/wrinfo/>. Those disagreeing with the Department's decision as expressed in the PFO have 45 days to file a protest.

**The protest deadline for proposed final orders appearing in this public notice is 5pm, Friday, September 15, 2023.**

The protest filing fee is \$480 for the applicants and \$950 for non-applicants. Detailed requirements for filing a protest are included in the PFO. Persons who support the PFO may file a "standing" fee of \$270 to retain the ability to participate in future proceedings relating to an application. Before participation in a hearing is allowed, an additional \$680 will be required to request to participate as a party or limited party.

If a protest or comment deadline falls on a day that the office is closed, then the next open business day automatically becomes the deadline date.

## **Emergency Water Use (Drought) Applications (OAR 690-019-0040)**

When a drought is declared under ORS 536.740, the Director is authorized to issue emergency use permits to replace water not available under an existing right because of the drought. The Director shall approve an application for emergency water use upon findings that the proposed use will not cause injury to existing water rights and will not impair or be detrimental to the public interest. OAR 690-019-0040(3). In evaluating whether the proposed use will impair or be detrimental to the public interest, the Director shall consider the factors described in OAR 690-310-0120 and 690-310-0130; and

- a) The need for water because of the drought emergency; and
- b) The short-term nature of the proposed emergency use.

The following is a list of emergency water use permit applications recently filed, or which have recently received a final order, pursuant to OAR 690-019-0040. For any emergency use permits issued, the expiration date will not exceed the term of the Governor's declared drought or one year. The Director will consider all comments received concerning the use, or proposed use, under the emergency use permit throughout the life of the permit. (OAR 690-019-0040(4)(b))

## Applications for Allocation of Conserved Water

The following applications for allocation of conserved water have been received pursuant to ORS 537.455 to 537.500 and OAR Chapter 690, Division 18. In reviewing the applications, the Department will consider whether the diversion for the uses allowed under the original water right will be reduced by the conservation project, whether existing water rights will be protected from injury, and whether the project is in compliance with local comprehensive land use plans.

### **Notice of Application for Allocation of Conserved Water CW-138**

**CW-138** filed by Ashley and Brian Lindsay, 28376 Pleasant Valley Road, Sweet Home, OR 97386, proposes to convert approx. 9.7 acres from the use of big guns to high efficiency drip emitters under Certificate 14466 with a March 23, 1939, priority from an unnamed stream (Gabriel Creek), tributary of South Santiam River. The project on the unnamed stream is expected to conserve approx. 0.095 cfs and a max. duty of 23.1 acre-feet (AF).

The Applicant proposes 25% of the conserved water (0.024 cfs/5.8 AF) be allocated to the state for instream purposes.

The project appears to be consistent with the requirements under ORS 537.470. Any interested person may submit written comments directly related to CW-138 within 20 days of the last date of newspaper publication, being by 5:00pm on, **August 29, 2023**. Comments should be sent to the attention of the ACW Program, Water Resources Department, 725 Summer Street NE, Suite A, Salem, OR 97301.

**Applications for Extensions of Time  
to Perfect Water Right Permits filed pursuant to OAR 690-315**

**Consistent with OAR 690-315-0050, the Department will accept public comment on the following extension applications until August 31, 2023.** Following the comment period, the Department will prepare and issue a proposed final order. Individuals who would like a copy of the proposed final order may request copies by sending a request and \$35 (the charge required by law). Please indicate the file number. Copies of the proposed final order may be viewed at the Department and/or self-copied. Individuals wishing to obtain a copy of the extension application should contact the Department by phone or in person.

## Applications for Limited Licenses

A limited license allows the right to use or store water for no more than 5 consecutive years. Use of water under a limited license is subordinate to all other authorized uses and may be shut-off at any time to satisfy those other uses. In addition, the Department may revoke a limited license if its use causes injury to any other water right or minimum perennial streamflow.

Licensees must maintain a record of how much water they are using (ORS 537.143). **The Department may approve a license after August 15, 2023, upon finding that the proposed water use will not impair or be detrimental to the public interest (OAR 690-340-030).** The public is invited to provide comments that will assist the Director in determining whether the use would impair or be detrimental to the public interest. If the applicant applies for a use that is not one of the standard uses listed in OAR 690-300, the Department may, for the purposes of this notice, assign a named use that is reasonably close to the use actually requested. The public may examine the actual application by clicking the associated hyperlink and then choosing "LL Application" under "Scanned Documents."

## Applications for Instream Lease

ORS 537.348 authorizes a water right holder to lease their existing water right(s) to instream use for a limited time. For the term of the lease, the water right holder agrees to suspend use of water under the original right. The state is the trustee for water rights leased for instream use. OAR 690-077-0077 requires that the Department public notice the lease applications.

**The deadline for submitting claims of injury to existing water rights or enlargement of the original right against a lease application is August 22, 2023.** Parties to the lease, including the Department, will review any such claims before the lease is finalized. The lease files are available for viewing at the Salem office of the Water Resources Department. If you have questions or comments please contact the Lease Specialist at 503-986-0898.

## **Transfer Preliminary Determinations**

A Preliminary Determination provides the Department's conclusion as to whether a proposed change in place of use, point of diversion or appropriation, or character of use of an existing water right should be approved. Changes of water rights may be proposed in an application for transfer (including instream, historic POD, exchange, substitution or ground water registration modification).

The Department has issued preliminary determinations on the transfer applications listed below. In addition to this notice, the Department is complying with ORS 540.520(2) that requires publication of notice in a local newspaper for all transfers except those proposing a change in place of use only or a change in point of diversion of less than ¼ mile where there are no intervening diversion points.

Any person may protest the application and preliminary determination or may file a standing statement. Pursuant to OAR 690-380-4030(3) and OAR 690-382-0900, protests must raise all reasonably ascertainable issues and include all reasonably available arguments supporting the person's position. In addition, protests must be accompanied by a \$950 protest fee for non-applicant and \$480.00 protest fee for applicant. Call (503) 986-0815 to obtain additional information. Protests must be received by the Department on or before August 31, 2023, or within 30 days of the last date of publication in a newspaper, whichever is later. If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

## Transfer Applications: Temporary Transfer

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation. The Department shall approve the request provided it does not cause injury to existing water rights or enlarge the water use. If after the change is approved, it is found to cause injury, the approved change may be revoked. The use of water reverts to the authorized place of use upon expiration of the temporary change.
