Note: No projects are active in the Upper Deschutes Subbasin and the Metolius River Subbasin

Note: Many mitigation credit projects result in mitigation credits that may be used in more than one zone of impact.

Note: Mitigation credits used in the Squaw Creek and Crooked River Zones of Impact have also been subtracted from the General Zone of Impact, as those credits are also no longer available in the General Zone.

Note: Some mitigation credits used for reserves in the General Zone were also subtracted from the Squaw Creek Zone as they originated from a Squaw Creek project.
