Attachment 5

Note: No projects are active in the Upper Deschutes Subbasin and the Metolius River Subbasin

Note: Many mitigation credit projects result in mitigation credits that may be used in more than one zone of impact. Mitigation credits used in one zone are also subtracted from any other zone in which they may have been available. These subtractions are reflected in "Mitigation Still Available"

Note: A portion of the instream rate and volume on the Deschutes River originated from instream leases on the Little Deschutes. This quantity has been subtracted from "Totals" to accurately reflect the total quantities protected instream.
