

Managed Aquifer Recharge

When: June 7, 2011
8:15 am - 4:45 pm

Where: Red Lion Hotel
2300 Evergreen Park Drive SW
Olympia, Washington 98502

Cost: varies, \$75 (students) up to \$220 (general) for pre-registration

Sponsored by: The American Ground Water Trust and Layne Christensen

Contact: for additional information.and/or to register: website: <http://www.agwt.org>
telephone: 800-423-7748

This seminar has been assigned a total of five (5) CECs (continuing education credits) by the Well Constructors Continuing Education Committee.

Course Description:

This Water Management Strategies/Aquifer Storage program will bring together engineers, scientists, planners, water-resource managers, agency professionals, attorneys, concerned citizens, etc. to share up-to-date information regarding the challenges, feasibility, potential, regulatory concerns and the economic & environmental benefits of aquifer management strategies involving artificial recharge, aquifer storage and ground water management.

This program will provide an opportunity for all interested parties to hear about the latest progress and development in ASR from scientific, engineering, management and regulatory perspectives. The future of ASR technology applications in northwest states and provinces has huge significance for resource management, development planning, and ecological restoration. There are important, financial, institutional, legal and water quality issues that have to be resolved. The program will include presentations on projects where aquifer recharge is already a significant part of the portfolio of water management tools.
