Permit Applications – Initial Review and Proposed Final Orders

The following pages of this notice list permit applications that the Department is evaluating for compliance with state water law. Public participation and comment is encouraged. Opportunities for public involvement vary according to the stage of the permit evaluation.

Initial Review (IR) Stage

The Department has given the applicant an initial review of water-use restrictions, water availability and other limitations that affect the agency's decision on whether to issue a permit. The Department welcomes comments from interested persons, agencies and organizations on the proposed water use. **The comment deadline for initial reviews appearing in this public notice is 5pm, Thursday, July 23, 2026.** Although we cannot respond individually to all comments, each will be considered as the agency makes its decision regarding proposed allocations.

Proposed Final Order (PFO) Stage

The proposed final order is the Department's penultimate decision on the water use request. The PFO documents the agency's decision through specific findings, including review of comments received. If appropriate, it includes a draft permit specifying any conditions or restrictions on the use. Persons interested in receiving a mailed copy of a PFO must pay a statutorily-required fee of \$53. (Any person paying \$53 to receive a PFO by mail will also receive a copy of the Final Order when it is issued.) PFOs may be viewed free of charge online at: <http://apps.wrd.state.or.us/apps/wr/wrinfo/>. Those disagreeing with the Department's decision as expressed in the PFO have 45 days to file a protest. Detailed information related to filing a protest can be found within the PFO.

The protest deadline for proposed final orders appearing in this public notice is 5pm, Friday, August 07, 2026.

If a protest or comment deadline falls on a day that the office is closed, then the next open business day automatically becomes the deadline date.

Aquifer Storage and Recovery (ASR) Limited Licenses - Modifications

ASR means the storage of water from a separate source that meets drinking water standards in a suitable aquifer for later recovery and not having as one of its primary purposes the restoration of the aquifer (ORS 537.531). Only after completion of an ASR testing program under a limited license may an applicant apply for a permanent ASR permit.

OAR 690-350-0020(5) requires that an ASR limited license contain a condition that provides for license modification. Either the licensee or the Water Resources Department can initiate changes for items that are specified in the condition. Some small modifications are termed minor adjustments and can be accomplished without public notice and comment. Other changes are presented for public notice to obtain public comments. Following the 30-day public comment period, the Department may request additional information from the applicant, modify the ASR limited license, or deny the modification request.
