

Water Resources Commission Meeting April 19, 2012

### Outline

- Debrief from March 8 Policy Advisory Group Meeting
- Meetings with Boards and Commissions
- Public Comments received through March 15
- Planned revisions to the December 2011 Discussion Draft
- Calendar and Next Steps
- Workplan Walk-Through and Discussion

## Debrief from March 8 PAG Meeting

- Final meeting (8 out of 8)
- Governor shares thoughts
- Thumbs up on remaining actions
- Extensive discussion on place-based planning
- Suggested changes:
  - \* New executive summary
  - \* Recognize past successes
  - \* Remove keys, develop implementation plan instead
- PAG members continuing to advocate for IWRS

### Meetings with Boards and Commissions

### Past Meetings

**Environmental Quality Commission** 

Fish & Wildlife Commission

Board of Agriculture

**Board of Forestry** 

Geology & Mineral Industries Governing Board

Oregon Watershed Enhancement Board

**Drinking Water Advisory Committee (OHA)** 

### **Upcoming Meetings**

Oregon Marine Board

Land Conservation & Development Commission

### **Public Comments**

- Comments focused on Dec. 2011 Discussion Draft
- Comment period ended March 15
- More than 45 individuals & organizations

### **Planned Revisions**

- Revamped Executive Summary (See Attachment 2)
- Added Conclusion / Workplan (See Attachment 3)
- Four instead of 12 chapters, based on Objectives
- Reflect positive accomplishments (See timeline)
- The role of Agriculture in the economy & environment
- Expand text related to environmental justice,
   role of federal government, need for instream flows,
   need for storage
- Remove non-essential background information
- Guest essays shortened, added disclaimer
- Recommended actions distributed throughout text
- Objective 4 re-organized (educ/outreach, public health, funding)

### Calendar and Next Steps

- Continue to meet with boards/commissions
- Requesting written endorsements by June 1
- Revised IWRS to WRC in May
- WRC considers adoption at August meeting
- Implementation begins; budget and legislative requests for 2013 Legislative Session

10-year outcomes. Implementation matters. – Page 1

Agenda Item D: Attachment 3 DRAFT: April 5, 2012

#### IWRS Conclusion: Next Steps

Oregon's Integrated Water Resources Strategy contains a number of Recommended Actions, which, taken together, provide a blueprint for the State of Oregon to follow in order to understand and meet its water resource needs. The reality of our national, state, and local economic situation means that implementation of these Recommended Actions may not be as robust or aggressive as desired.

However, the current economy cannot curb Oregon's commitment to meeting current and future water needs, which include economic growth and environmental protection. Oregon's goal is to secure successful outcomes in both of these areas, and the Integrated Water Resources Strategy offers a series of "next steps" to get us there.

This Strategy offers an opportunity to take a long-term approach to water resource management, setting forth a workplan and budget according to five- and ten-year outcomes.

Five-Year Outcome:
Provide essential services and conduct in-basin work,
improving Oregon's ability to understand and meet its water needs.

Ten-Year Outcome (2017-22): Strengthen essential services and in-basin work, positioning Oregon to address emerging issues that affect our water needs and supplies.

The "Next Steps," enumerated below, require attention during the implementation phase (2012-17 Some steps are already underway, either as part of ongoing efforts, or because they do not require additional funding or authorizations from the Oregon Legislature. Some steps require assistance from the Oregon Legislature, which meets next in 2013. Other steps have been deferred until 2015 in order to implement in stages. All Recommended Actions described in the IWRS are reflected in the workplan.

These Next Steps operationalize the Recommended Actions noted throughout the IWRS, providing further detail about the likely lead agency, staffing and budget requirements. Several draw upon more than one Recommended Action, as noted.

How Oregon goes about implementing these steps is important as well. The State has made commitments on a number of fronts, including accountability, a balanced approach, collaboration, an open public process, reasonable cost, science-based approaches, streamlining, and other principles memorialized in the IWRS framework. Policy-makers responsible for implementation have a duty to conduct the next phase as carefully as they did in the development of the IWRS.

- Page 1 10-year outcomes. Implementation matters.
- pp. 2-3 efforts already underway, plan to continue.

Agenda Item D: Attachment 3 DRAFT: April 5, 2012

Capitalize the SB 1069 (2008) feasibility study grant fund.

13C 1 \$1M WRD No

Secure authority and funding for the state to serve as a water contractor. Partner with federal agencies and interested stakeholders to gain access to existing stored water in basins such as the Columbia and Willamette. This concept would allow the Water Resources Department to contract with instream and out-of-stream interests, providing water secured through agreements with other states or the federal government. Establish a Water Procurement and Development Fund for the state to purchase water. Lead staff would be IWRS Coordinator (see \* above), plus senior finance specialist

Agenda Item D: Attachment 3 DRAFT: April 5, 2012 Work In-Basin: New Steps Requiring Legislative Assistance in 2013 Step Contributing Total Cost Lead Requires Recommended Required Estimates Agency(ies) Legislative per 2 yrs per 2 yrs Concept? Conduct Additional Groundwater Investigations, characterizing the relationship between surface water and groundwater, determining characteristics of groundwater (location, volume, quality, etc.), studying the location and use of exempt use wells, and identifying the location of underground injection control systems (UICs). Evaluate and update Oregon's groundwater administrative areas, for both water quantity and quality. Use high resolution remote sensing where appropriate. 1A, 2B, 3B \$750K WRD, DEQ Calculate and Protect Instream Flows. The Oregon Department of Fish and Wildlife, Department of Environmental Quality, and Parks and Recreation Department are authorized to apply for instream water rights for specific purposes, such as protection of fish habitat, water quality, and scenic waterways. Such applications require scientific analysis and modeling to determine the instream needs for base and elevated flows. Much work remains to determine such needs. Apply for instream water rights as appropriate. 3A, 3B, 12B \$250K ODFW, WRD Develop and test a template for place-based planning. Incent the local water resource planning process in Oregon, to help assess and meet water needs and to plan the state's water future. Voluntary, local efforts will "roll up" into and inform the State's Integrated Water Resources Strategy. Using a template provided by the state to guide the process, communities will address the unique hydrology and water needs (instream and out-of-stream) locally, optimizing outcomes. The state, through the four key IWRS agencies, will develop and test a template under the IWRS for place-based planning and will seek further grant funding and other incentives to assist with local planning efforts. This approach is meant to empower communities to conduct place-based planning in consultation with the state. Lead staff would be IWRS Coordinator (see \*\* above) \$500K WRD 10A. 7A No above in grants Collaborate cross-agency to implement existing ecological plans and recovery efforts (e.g., coordinate water quality-related restoration with Fish Recovery Plan habitat restoration). Convene key agencies, watershed councils, and stakeholders to as part of the place-based planning efforts described above, pool resources and achieve multiple goals simultaneously.

Implementing the second edition of the Integrated Water Resources Strategy will involve maturing the into the programs initially laid out in 2012, as well as initiating work on Recommended Actions that were not funding in the first five years. It will also involve addressing critical issues that emerge after the adoption of the initial rendition Integrated Water Resources Strategy.
