

CANCELLED - (APRIL 3, 2006)

Well Reports in Hydrology/Natural Variations in Ground Water Composition

Course Description: The first part of the course will provide examples of how data is obtained from well reports and will stress the importance of the well constructor's observations. The course illustrates the important role that well drillers provide in hydrogeology. The second part of the course will provide the well constructor community with an understanding of why groundwater composition differs from one well to another and from one season to another. This course will allow the well driller to better communicate with the public regarding water quality.

Date: April 4, 2006 - CANCELLED Due to lack of participation.

Location: OWRD, 725 Summer Street NE, Conference Room 124, Salem, Oregon

Cost: none

Contact: Dennis Nelson, Dept. Human Services, Drinking Water Program 541 726-2587 ext. 21

This course has been assigned four (4) continuing education credits (CECs) by the Well Constructor Continuing Education Committee.

Note added April 3, 2006: If you are interested in attending this class, contact Dennis Nelson about the possibility of re-scheduling.
