**RESUME OF PROGRAMS FOR CONTROL
AND USE OF STATE'S WATER RESOURCES**

Resume of Programs for Control and Use of State's Water Resources

690-80-000 Pursuant to the requirements of ORS 536.300, the Water Policy Review Board is formulating an integrated, coordinated program for the use and control of the state water resources.

The program statements deal principally with the following matters:

(1) A statement of the multi-purpose concept which classifies particular waters.

(2) A statement of policy designed to maintain a minimum perennial streamflow sufficient to support aquatic life and minimize pollution.

(3) A statement that applications for use of water shall not be accepted for any other purpose.

(4) The policy on rights to use of water for industrial purposes granted by any state agency.

(5) The statement that structures or works which do not give proper cognizance to the multiple-purpose concept and unless planned, constructed, and operated in conformity with applicable provisions of ORS 536.310 are declared to be prejudicial to the public interest.

Program statements have been formulated for the areas in Table 1.
