So thus far I have made several complaints of water theft around the 9 mile marker of butte falls hwy. this water is being delivered by illegal non registered water trucks through my property that I have well water irrigation rights on. My conversation this morning with Dave Ford went to the affect that he knows illegal water is going to these grows with his knowledge and he has no plan or actions planed to stop it. Epid. Dave Ford has had a small water canal that my property had gotten year around water from for 10 acres of pasture and pines shut down completely to cut water to grow sights. This water has flown through to the year round salmon and steelhead fishery that we have naturally on our property. This time of year without that water I have lost hundreds of trees and over 200 small fry fish and over 50 native cut through trout. This has never happened the last 7 years I've owned the property and the last 25 years of the previous owner. Epid seems reluctant to help in any way and to us as a ranch and other ranchers they would rather let the grows take the water and not have conflict. Please help us. How much land has to be ruined and natural life damaged from rerouting natural water flow

Hi Shad....you are no inconvenience at all, and I am really happy to help you. Since you can't make oral public comment, would like to provide something in writing? I can get that to the Commission ahead of the meeting, if that is something you would like me to do. You can provide comment in an email to me and I can get it in the meeting materials. The deadline to file written public comment to ensure full consideration by the Commission is 5pm this Friday. You can also send it after the deadline, however it would allow less time for the Commission to review. Let me know if I can help in any way. I have attached a copy of the agenda, which includes details about the meeting you may find helpful.

Thanks so much,

Nirvana Cook

Yes Shad Allen Vaughan. I cannot make a personal public comment but am trying to draw out an issue that pertains to eagle point irrigation district allowing irrigation patrons and other non patrons to use irrigation water for illegal marijuana grows locally around eagle point and abuse of power by Dave Ford of epid to damage a local fish bearing stream called quartz creek Thank you. Sorry for any inconvenience

Good Morning,

I have received your request to make oral public comment at the August 25 Commission meeting. It doesn't appear that you listed your full name in the request form. Will you please provide me with your full name?

Thank you,

Nirvana Cook
