Dear Sir:

Reference is made to the water well driller's report for the well you had constructed by J. A. Sneed & Sons.

This report gives considerable information as to the ground water resources beneath your property, but unfortunately we are not able to accurately locate your well on our maps.

As it is the well owner's responsibility under the provisions of ORS 537.765 to see that an adequate well location description is furnished with the well report, we are requesting that you supply us with a location description of your well.

The well location should be given with respect to a section corner or donation land claim corner. If this information is not readily available, the complete legal description of the property on which the well is located and the location of the well on the property with respect to a property corner will suffice.

Very truly yours,

Lewis A. Stanley
