MATERIAL	From	To	SWL
Well was originally reported to have been drilled by Goral LaPorte Well Drilling in 1981.			
We sounded well at 224'; removed 224.5' of 6" liner; ran in 7-7/8 bit and stabilizer and reamed from 47' to 227'; installed screen and liner; swabbed and bailed; and then set pump.			
* Water levels were not taken because of interference from tempering well No. 1; however, 1" PVC access pipe extends to top of pump for future measuring with electric probe.			

Date work started 11/12/85 /completed 11/19/85
